Course curriculum SASE11 Economic Growth, Labour Market and the Population (svensk benämning Ekonomisk tillväxt, arbetsmarknad och befolkning)
Area of Science: Economic history, undergraduate level (progression level: G1N), 7.5 hp (ECTS).

The course was established by the Board of the Department of Economic History, School of Economics and Management, Lund University 2011-06-07.

1. Course level and placement within the educational system
The course can be studied during the first semester of Economic History at the undergraduate level. It can be included as an optional course in several Bachelor programmes and it can be studied as a single-subject course. The language of instruction is English.

2. Learning outcomes
After having passed the course students are expected
• to have insights in Sweden's transformation to an industrial society, structural changes in Swedish economic development and the economic structure of modern Sweden;
• to have insights in post-war economic growth, the history of “the Swedish model” and the welfare state;
• to be able to clarify accounts of Swedish economic history and to relate these to processes of economic development and institutional change;
• to be able to present, orally and in writing, analyses of Swedish economic development.

3. Course content
The content of the course is delimited of both teaching and literature.
The course examines Swedish economic development in a long-term perspective. It starts with an overview of the agrarian past of Sweden, its peculiarities and its similarities with other regions in Europe. The process of Swedish industrialisation is studied in the general context of economic changes in the nineteenth-century Europe. Another topic is the modern welfare state in Sweden in a comparative perspective. The development of the welfare state is treated in the wider context of the Swedish economic model. Special attention is given to the changing role of women in the labour market and in the economy. Furthermore, the Swedish economic development during the 1980s and 1990s is presented and analysed. Economic policy measures introduced in the 1990s to cope with the problems of the economy will be described and discussed. Particular consideration is given to the high degree of internationalisation of the Swedish economy and Sweden’s relationship to the EU.

4. Teaching and assessment
The course is designed as a series of lectures, exercises and work with projects reports. Grading is based on both individual and group performance, via written exams, presentations and other mandatory activities.

5. Grading scale
At the School of Economics and Management grades are awarded in accordance with a criterion-based grading scale UA:
A: Excellent
B: Very good
C: Good
D: Satisfactory
Students have to receive a grade of E or higher in order to pass a course.
